To whom it may concern

Oslo, 2<sup>nd</sup>. December 2021

## **SKIPPER Echo sounders GDS101 and GDS102 are obsolete products.**

Echo sounders GDS101 (single channel) and GDS102 (dual channel) are obsolete and replaced by ESN100 and ESN200.

ESN100 (single channel) and ESN200 (dual channel) will, in most cases, replace the old GDS101 and GDS102. The ESN100 and ESN200 have the same approved transducers as in GDS101 and GDS102.

### Different form

The ESN100 and ESN200 consist of a separate display unit and electronic unit.

### Different fit

ESN100 and ESN200 display and electronic unit are smaller than GDS101 and GDS102. A retrofit plate may be purchased to fit the new units into an existing GDS101/GDS102 hole.

### Some different functions

The ESN100 and ESN200 are more modern equipment. Most of the normal in/out interfaces are the same but there are some additional and some removed functions. Please see brochures and specification.
