

Service data bulletin

Instrument:
DL850/EML224/GDS101/GDS102

Date: 29.05.2008
Created by: Geir Theodorsen

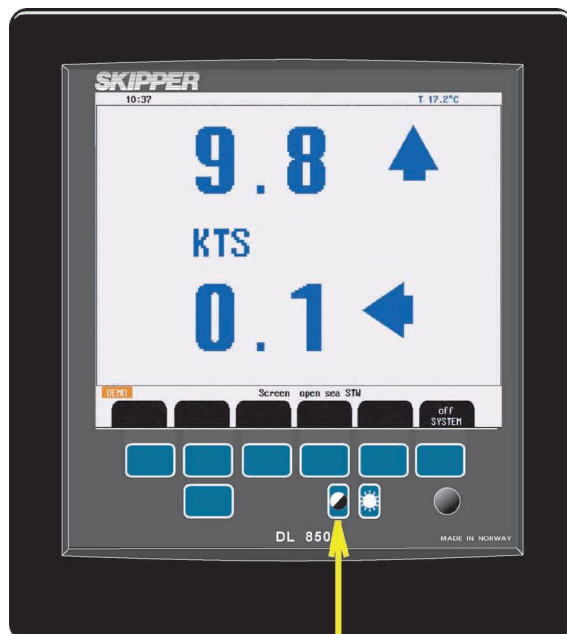

SUBJECT: Screen “dead”

WHAT TO DO: It is possible to adjust the brightness down to 0 on the display. Specially together with night version it is possible to misunderstand the screen to be “dead”.

These setting will remain even when unit is switched OFF and then ON.

Please check these settings before calling service.
