

Welcome to the January edition of the SKIPPER Newsletter.

HAPPY NEW YEAR!

Sales

SKIPPER Electronics change ERP solution:

Next week starting from 25. January 2016 SKIPPER Electronics will change the internal ERP system to Rambase by Hatteland.

The change is done in order to make the production process more efficient and accurate. We hope that the changeover will not cause any problem for you, but we know that issues can arise. We are sorry for the inconvenience this may cause.

The changeover will be done this weekend, and the plan is that the new system should be operative from Monday 25. January. We will therefore be closed Friday 22. January.

New software for SKIPPER GDS101 and GDS102:

Starting from February SKIPPER will release new software for both GDS101 and GDS102. The major changes in the new software is that NMEA0183 ALR alarms will satisfy the new alarm management regulations that take force in April 2016. This will allow the user to select a method of alarming that meets the category A specification in MSC.302(87) Adoption of performance standards for bridge alert management.

New software for compact repeaters:

New software will be released in February for the compact displays. Especially for the compact multirepeater (CD401MR-SB) which corrects the occasional crashing seen on heavy NMEA load. The new version is 1.18 and is available from www.skipper.no or as a chip.

Company evaluation:

SKIPPER would like your feedback regarding our products and service. The evaluation will take 2 minutes. [Please access the evaluation here!](#)
