Sales

Another new retrofit solution from SKIPPER!

Sperry SRD500 and SRD421 are now obsolete and SKIPPER has developed a new retrofit solution to these speed logs.

All electronics need to be changed, but the installation is possible with the vessel afloat, or when the vessel is at dry-dock, without changing the existing Sperry SRD500/421 Sea Valve housing. The solution will be available in the end of February.

Part numbers needed are:

- **DL850D27-SD** Log operator unit DL850 270 kHz with docking
- **DL850T27-SB** Log transceiver unit for DL850 270 kHz SKIPPER
- **DL850S27W-SB** Log sensor DL850 270 kHz SPERRY SRD-500 Sea chest 40m cable

Optional repeater:

- **CD401MR-SB** CD401, SKIPPER Multi Repeater

Please contact your closest dealer for a quotation!

In addition to the Sperry SRD500/SRD421 retrofit, SKIPPER offer retrofit solutions to several existing Speed Logs:

- Atlas Dolog (SKIPPER DL850)
- SAGEM (SKIPPER EML224 Compact)
- SIMRAD NL (SKIPPER EML224 Compact)
- SPERRY SRD-331 (Naviknot III) (SKIPPER EML224 Compact)

Company evaluation

SKIPPER would like your feedback regarding our products and service. The evaluation will take 2 minutes. [Please access the evaluation here!](#)
