New price on the EML224 Graphical display for 2012

SKIPPER Electronics will increase the price for the EML224 Graphical display from 01.01.2012. This is due to the fact that we reduced the price on this display, waiting for the new EML224 Compact display. The EML224 Compact display is now readily available for the last 3 years, and the feedback from our customers shows that the Compact display is the display for the future.

SKIPPER will therefore increase the price for the EML224 Graphical display to the same level as the DL850 Graphical display.

More information on the EML224 Compact could be found here - <http://www.skipper.no/speed-logs-products-80/119-skipper-eml224-compact.html>

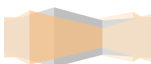

Marintec Shanghai 2011:
