### DL850 270 kHz Sensor will now be delivered in two colors.

SKIPPER now has the ability to use different suppliers for the molding materials. We are therefore aiming at shorter delivery time for these sensors. The color variation will be the only difference between the two sensors. It will not be possible to order your preferred color.

The part numbers will be equal.

### Color change for the Transceiver cabinets:

There will be a slight lighter grey color for the Transceiver cabinets due to a change in standardized color from the supplier. The color will be the same as the light grey color used on our JB60 cabinets.

RAL7035 will be the new grey color.

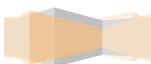

RAL7032 was the old grey color.

This change will take effect in, or before autumn 2013.

It will not be possible to order your preferred color.

### Company evaluation

SKIPPER would like your feedback regarding our products and service. The evaluation will take 2 minutes. [Please access the evaluation here!](#)
