CD401MR-SB Compact Multirepeater:

SKIPPER has now developed, and has already sold several units of this Compact Multirepeater.

The SKIPPER CD401MR-SB is a remote multirepeater for NMEA signals. It is designed for use with SKIPPER products together with products from other manufactures, when these have an NMEA 0183 output.

All information you could get from this Multirepeater is listed below:

- Depth - below surface, keel and transducer
- Speed - over ground and through water (longitudinal, transverse, aft and relative)
- Distance - total/trip for both ground and water
- Heading - true, magnetic and relative
- Rotation - rate of turn and direction
- Pitch and Roll - Bow position and starboard/port heel
- Wind - speed and direction (true, magnetic and relative)
- Temperature - water and air
- Drive - RPM, propeller pitch and rudder position
- Clock - UTC, local time and expected time of arrival (ETA)

The dimensions are only 144x144 mm.

The multi repeater could also be dimmed as all SKIPPER repeaters with an external dimmer (IR30DIM).
