### BATTERIES IN DL850 CABINET

There are two batteries in the DL850 Cabinet

On the I/O board a battery keeps the user settings. This battery is soldered into the PCB.

Lithium 3V Type CR-2032  
SKIPPER Part number  
ZZG-01003

On the CPU board a battery keeps the setup of CPU.  
The DL850 will not initialize properly if the battery is flat.  
The Battery is a “click-on” type CR2032.  
SKIPPER part number ZZG-01005.  
Note: On older CPUs you will have to remove  
the I/O board to access the CPU battery.
