

**DL850S27DR-SB. Log Sensor for Dolog retrofit w diver DL850 270KHz**  
**DL850S27TR-SB. Log Sensor for Tank SKIPPER retrofit w diver DL850 270KHz**

SKIPPER speed log sensors to be changed by divers are supplied with a water tight cable end to avoid water intrusion into cable during diving operation

The following parts are supplied:

- Parts to prepare connector end after diving operation is finished. (The original cable end is supplied as a reference)
- Installation kit for tank
- Bolts with wing nuts and washers for divers to use as guides during sensor mounting.

### Prepare cable end for connection:

- Strip green plastic 25cm
- Push the screen back over the green plastic. Keep 60mm of the screen.
- Fasten screen with tape.
- insert 15mm heat shrink over foil and remove 40mm of the foil in the cable end.
- Remove 6mm insulation on each cable end
- Mount heat shrink labels J502 and J503.
