Instrument: GDF201
SDB: Modify 50% power

Date: 26.01.2007
Created by: Geir Theodorsen

Guide to modify the terminal board to give 50% power reduction to transducer.

NOTE! Modifications done on PCBs will void warranty from SKIPPER Electronics.

PROCEDURE: Unsolder the leg of FL406. Lift it up from print.
Solder a strap from the leg to pin 16 of IC404.
